INTERNATIONAL CENTRE FOR PROFESSIONAL DEVELOPMENT (ICPD), FUNAAB.
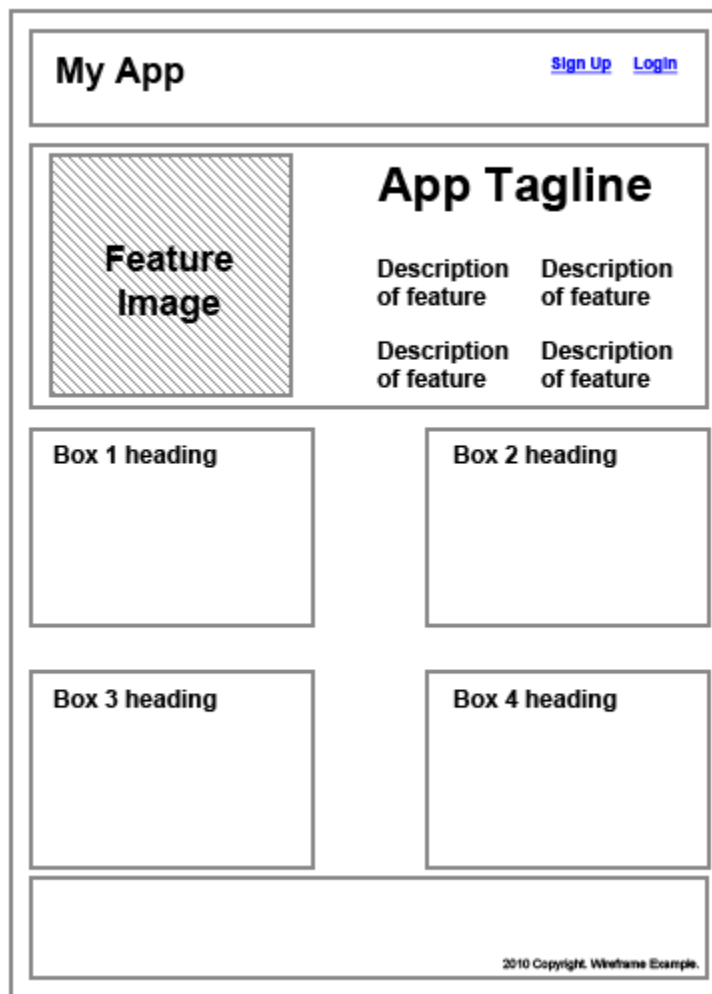

INTENSIVE WEBSITE DEVELOPMENT TRAINING

ASSIGNMENT I

1. State the language(s) used in the following layers of the website:
    - Content layer
    - Presentation layer
    - Behavior layer

2. List the three methods of using CSS; which of these methods is the best?

3. Using HTML and CSS only, produce the following wireframes:

Branding Header	Secure Page

Global Navigation

Page Title & Intro	Customer Support

Secondary Navigation

Application Form

Footer

Note: answer questions 1 and 2 on an A4 paper, question 3 is practical, write the codes.

Hint to question 3: create the components with *div*, and then use *CSS* to manipulate the *height* and *width* properties.

Good luck!

-Steve
